

Small Walk-In Closet Worksheet

The reasoning behind each step: www.honey-doers.com/blog/5-small-walk-in-closet-ideas-for-storage/

The room

Back wall width, in inches

Left wall depth, in inches

Right wall depth, in inches

Ceiling height, in inches

Door width and which way it swings

Distance from the door to the nearest corner

Window, vent, attic hatch, switch, and outlet locations

What you hang

Long items (dresses, coats, robes), count

Your longest hanging item, in inches

Short items (shirts, jackets, pants on hangers), count

What you fold and store

Folded stacks (sweaters, jeans, t-shirts)

Shoes, pairs

Bags, hats, belts, and accessories

Off-season bins

Before you choose a layout

- ☐ Every wall with a clothes rod has about 24 inches of depth in front of it
- ☐ The aisle is at least 24 inches clear, 36 if two people share it
- ☐ The door swing clears rods, shelves, and drawers, or can be rehung
- ☐ Drawers have room to pull out fully into the aisle
- ☐ Any light fixture is at least 12 inches from shelves and rods (6 if recessed)
- ☐ There is an outlet or junction box if you want lit shelves

Sketch your closet (one square = 1 foot; clothes on a rod take two squares from the wall)
